

## *Safety Focused at Coast To Coast GC*

Greetings,

We're proud to announce that currently Coast To Coast is celebrating Building Safety Awareness Month. Our Coast To Coast General Contractors safety coordinator has over ten years of safety experience. Each of our project foreman and project managers are 30-hour OSHA certified and are safety focused. Each has gone through extensive certification for swing stage and scaffolding setup.

*Building  
Safety  
Month!  
May*

In the month of May, we've been taking extra measures to emphasize and educate our employees on the safety measures of each job site. We believe that safety is top priority. Safety discussions and trainings will take place, aimed to raise awareness of preventing any hazards. Our company values safety and focuses on in-depth training that instills and encourages safe behaviors throughout every step of the way. Our clients have the peace of mind of knowing that they have the best general contractors working on their building. We offer the best concrete restoration job in town, and our employees are confident that their safety equipment is the best in the market.

Our clients have the peace of mind of knowing that they have the best general contractors working on their building. We offer the best concrete restoration job in town, and our employees are confident that their safety equipment is the best in the market.

At CTC, we have over 200 employees working on various sites ranging from Miami to the Palm Beaches. The safety of our laborers come first, and the quality of our work is held at an even higher standard. CTC is committed to ensure that each employee returns home safely to their family at the completion of each work day. Some of our guys are working 450 feet in the air and their safety will never be compromised. A designated competent person is on site daily to ensure and signoff on the safety and all equipment being used.

For over 30 years, Coast To Coast has made sure our laborers review their safety checklist with their site manager for each stage with the assistance of the site supervisor. The following is a list of what we review before each workday begins at a job site: Check the swings, safety ropes, and work equipment before they are used everyday.

CTC specializes in performing exterior painting, expansion joint installation, and parking garage concrete restoration. Give us a call at (954) 920-3900 or visit our website for more information: [www.coasttocoastgc.com](http://www.coasttocoastgc.com)
